JAPAN TECHNOLOGY GROUP, INC. ENTERS THE PARTNERSHIP WITH YET2.COM AND COMPETITIVE TECHNOLOGIES, INC.

Japan Technology Group, Inc. is pleased to announce about new strategic alliances formed with Yet2.com and Competitive Technologies, Inc. to enhance the commercialization and licensing of intellectual property. The current collaborations are the additional to already existing partnering relationship with UTEK Corp. Between the partnering companies we have a global presence in the technology marketplace, with over 100,000 registered users and thousands of page views per day we can present intellectual property in front of a vast community of potential licensees. The relationship will benefit all the companies by matching US industrial giant companies with Japanese untapped intellectual properties.

About UTEK Corp.: UTEK® is a leading, market-driven technology transfer company that enables companies of all sizes to acquire innovative technologies from universities and research laboratories worldwide. In addition to the core technology transfer services, UTEK provides tools to search, analyze and manage university intellectual properties. Clients ranged from rapidly growing small capitalization firms to market leaders such as AstraZeneca, Amgen, P&G, IBM, Eastman Kodak, Dow, Raytheon and Boeing.

About Yet2.com: YET2.COM was founded with the joint investment from Siemens, Bayer, Honeywell, DuPont, P&G and NTT DoCoMo. Most of the Fortune 500 companies are engaged in technology licensing discussions through YET2.COM.

About Competitive Technologies, Inc.: Competitive Technologies, Inc. (CTT) is an invention management and technology transfer company specializing in the commercialization and licensing of intellectual property. CTT develops strategic global alliances to identify and deliver appropriate technology solutions to our customers. CTT has evaluated over 25,000 different technologies, finalized several hundred license agreements, and has been awarded a number of collaborative R&D contracts involving partnerships between universities industry and federal/state government.

About the Japan Technology Group

The Japan Technology Group is a global communications consulting company, focusing on trans-Pacific technology and intellectual property transfers, especially between Japan and North America. The Company was formed in the fall of 2003 in the University City Science Center in Philadelphia as an agent for U.S. companies seeking to transfer Japanese innovative technology into the U.S. market. To promote trans-Pacific technology transfer – the transfer of research results from universities to the commercial marketplace for the public benefit – the JTG attempts to facilitate U.S. companies' direct introduction of their needs to Japanese researchers, university technology licensing offices (TLOs) and university-based spinout companies. JTG attempts to serve as a link between North American companies and untapped promising Japanese innovations by assisting two parties communicate without the barriers of language, culture, physical distance and time differences. JTG and its affiliates also provide a one-stop solution for the strategic management of intellectual property rights, helping companies and universities locally and globally acquire and protect patents in Japan. More information about the Japan Technology Group can be found online at www.japantechnologygroup.com.
