JAPAN TECHNOLOGY GROUP, INC. ENTERS THE PARTNERSHIP WITH TECHCONNECT

Japan Technology Group, Inc. is pleased to announce about new strategic alliance formed with TechConnect, the global technology outreach development organization.

The partnership will enhance companies' commercialization and licensing activities by matching US industrial giant companies with Japanese untapped intellectual properties.

TechConnect organization is dedicated to locating the world's most promising advanced technology sectors and assisting in the development of ecosystems focused on accelerating the flow of technologies from the research phase to the viable market phase.

TechConnect produces conferences and publications founded upon the application of the academic Peer-Review process towards the evaluation of emerging technologies and early stage companies, while providing access to funding, tools and professional resources.

By organizing conferences, TechConnect brings innovative technologies to real world business through a global marketplace that includes Fortune 500 technology challenges and prescreened IP & early stage companies. Please see the details about the upcoming TechConnect Summit 2010 event at: <http://www.techconnectworld.com/Summit2010/>. JTG will be an exhibitor at this conference featuring innovations from major Japanese universities, their spin-outs and research institutions.

With extensive knowledge in industry, academia, and business development, TechConnect brings only the best ideas and companies to its audience. Industry markets served include Cleantech, Nanotechnology, Life Sciences, Technology Licensing (TechConnect Partnering).

If you would like to learn more about TechConnect please visit the organization's website <http://www.techconnect.org/>

About the Japan Technology Group:

The Japan Technology Group is a global communications consulting company, focusing on trans-Pacific technology and intellectual property transfers, especially between Japan and North America. The Company was formed in the fall of 2003 in the University City Science Center in Philadelphia as an agent for U.S. companies seeking to transfer Japanese innovative technology into the U.S. market. To promote trans-Pacific technology transfer, JTG facilitates U.S. companies' direct introduction of their needs to Japanese researchers, university technology licensing offices (TLOs) and university-based spinout companies. JTG serves as a link between North American companies and untapped promising Japanese innovations by assisting two parties communicate without the barriers of language, culture, physical distance and time differences. JTG and its affiliates also provide a one-stop solution for the strategic management of intellectual property rights, helping companies and universities locally and globally acquire and protect patents in Japan. More information about the Japan Technology Group can be found online at www.japantechnologygroup.com.
